Smart launcher 3 pro apk 3. 26. 19

Smart Launcher 3 Pro unlocks the full potential of Smart Launcher. Exclusive features, even more settings and total control of the category system + Double tap the icon to launch the second application + Your list of applications is automatically sorted by categories + Search Bar for quick search in applications, contacts and web + Messages on the home screen + Turn off the screen by double tapping or simply leaving your device on a flat surface + Integrated lock screen with messages + Highly customizable. Tons of themes and lock screen, support for almost all icon packs + Plugin architecture. You can download and activate the features you want Smart launcher provides a new Android experience focused on efficiency and customizable. A new simple home screen showing what's important. All applications are sorted by category. All you need is that you can perform your daily tasks faster and easier. Best Android Launcher 2020 - Android Central Best Android Launcher 2020 to customize - Tom's Guide Best Android Launch App for 2020 Efficiency - Android Headers Top 10 Launchers - Android Authority, Tech Radar Playstore Best App 2015 - Google -----West IN SMART LAUNCHER• Automatically sorting appsApps is automatically categorized, you no longer have to spend time organizing your badges! The benefits of automatically sorting apps have also been recognized by Apple, which introduced it to its app library in iOS 14. • Ambient themeSmart Launcher automatically changes theme colors according to your wallpaper. • Designed for one-handed use has moved the items needed for the most interaction at the bottom of the screen, where they are easier to achieve. • SettingsSmart Launcher is fully customizable. Now you can change each color of the smart launcher theme, unlocking endless color combination capabilities. Changing fonts on the home screen, choosing among thousands of fonts from Google Fonts. • Smart Search Smart Launcher search engine allows you to quickly find contacts and apps or perform activities such as searching the web, adding a contact or performing a calculation. • Responsive iconsFormat icons presented with Android 8.0 Oreo are fully supported and available for any Android device! Responsive icons mean not only customizable shapes, but also beautiful and large icons! Gestures and hotkeysBoth gestures and hotkeys are supported and customizable. You can turn off the screen by double-tapping or show the notification panel with a swipe. • The built-in weather clock widget The built-in widget has been redesigned to display information such as alarm, next event and weather. • The On-screen notificationSmart Launcher will now show you which apps have active notifications without requiring an external plugin to be downloaded. This makes this feature more stable and reliable. • Ultra-immersive modeY present you hide the navigation pane in the launcher to maximize screen space • Protect your appsYies can hide the apps you want and if you want to save Secret, you can protect them with a PIN. • The choice of wallpaperSmart Launcher includes a very effective choice of wallpapers, allowing you to choose between many sources of photos. You can also back up your wallpaper before you try a new one!-----salge launcher - a community!----s badge project that is regularly updated with new features to support the latest Android APIs and new devices. You can join our community and learn how to become a beta tester at this link: Happy Holidays from smart launcher team. We have great news for 2021, stay tuned! At the same time, we have introduced some improvements in SL 5.5. - Fixed a problem that prevented the installation of some picture as wallpaper; - Thumbnails in wallpaper selectors always mimic the aspect ratio of the device; - Samsung system icons now work as responsive icons (you may need to reset the icon package to see any changes); - Fixed a bug that caused some rookchip products to crash at the beginning of the app; - Fixed other minor bugs. SL 5.5 is finally here! - Scrolling categories- Editable themes- Custom fonts- Parallax wallpapers- Variable icon label sizesBuilding 34- Folders now have a more modern look and animation. - If you set the folder column number to Auto, the system will automatically select the best location depending on the icons in the folder. SL 5.5 finally here! - Scrolling categories- Editable themes - Custom fonts - Parallax wallpapers- Unified appearance icon for home page and application page - Variable icon labels - New color palette - Reorganized settings - 5 new adapt forms - Selected photos adapted to adaptive forms - New menu for accessing all premium featuresAny-31-buflx SL 5.5, finally here! - Scrollable Categories - Editable Themes - Custom Fonts- Parallax Wallpapers- Unified Appearance Icon for Home Page and Application Page - Variable Icon Labels - New Color Palette - Reorganized Settings - 5 New Adaptive Shapes - Featured Images Adapted responsive shapes - New menu for accessing all premium featuresBuilder 2 8-buflx build 43 - Performance improvements: Launch time is now 50% shorter - Fixed a bug that caused unexpected behavior when loading a Google feed - Fixed a bug that led to that the next panel never works in Indonesia -- While the changes are blocked , the launcher prevents applications from being removed using the search page. - Other minor changes. SL 5.4 Build 36- Fixed a bug that caused some misbehavior when running certain apps from the top screen. - Fixed a performance issue that caused some anticipation before opening the wallpaper screen; - Fixed a problem that caused manual icon editing to look a little different than others; - Icons on the home screen now updated faster. A big upgrade is in the works.
